

## Week Beginning 10<sup>th</sup> January 2022

Continuing from the learning last week we shall be looking at the season of winter, the weather and how it affects our environment. The children will have the opportunity to experiment and make discoveries with ice activities and discuss temperatures.

The children will be creating snowmen and having fun with snowmen counting games.

We plan to have some park walks at the end of the week.

Last week the children initiated building an extension on the play house under the canopy. To extend their play, we have provided our “builders” with specialist equipment, such as a cement mixer, wheel barrow and a spirit level.

We have developed an assault course inside to warm up and stay fit!

Next week is our Headcount Week.

Caroline will send an email with the details of your child's funded hours for you to confirm.

Visit [www.gov.uk](http://www.gov.uk) for further information about funded hours and how to apply.
