

Week Beginning 9th May 2022

Our caterpillars are growing rapidly, the children are showing great interest and are anticipating the changes that are imminent.

We have started a graph to show the different pets the children have at home. Thank you for the photos of pets sent in, children love to tell us how they look after them.

The children looked carefully and painted different spring flowers to create a display board. This week we will be planting sunflower seeds, when they have begun to grow, the children will bring them home to grow them on.

This week the children will be bringing home a Spring Watch sheet for them to look for signs of Spring in the environment.

The Wednesday afternoons in the environmental area at school, have been very much enjoyed by all the children and staff. As the vegetation grows and insects are more abundant, please dress your child in long trousers, sleeved clothing and enclosed footwear to avoid being stung or bitten.

On Friday morning we shall be walking down to the allotments to look at the changes and see what is growing. The children from the Reception Class will be joining us. It will be great to see some of our old friends.

Please apply long lasting sun protection before arriving.

(It would be a mammoth task for us to apply cream to 28 children)

Also, please avoid leaving cream in their bags in the cloakroom, as they are very kind and like to share it with their friends!

Many thanks
